

Employee Leave Policy

HRFlow AI • Sample Company Policy

1. Purpose

This policy establishes a consistent process for requesting, reviewing, approving, and recording employee leave.

2. Scope

This policy applies to all full-time and part-time employees, subject to their employment terms and applicable law.

3. Leave Types

- Casual Leave: For short-term personal needs. Employees should request it in advance whenever reasonably possible.
- Sick Leave: For illness or health-related recovery. The employee should notify their manager/HR as soon as reasonably possible.
- Emergency Leave: For unexpected situations requiring immediate absence. Notification should be provided as soon as practical.
- Earned/Annual Leave: For planned personal time, subject to available balance and approval.

4. Applying for Leave

- Submit the leave request through the HR system before the requested start date whenever possible.
- Provide the leave type, start date, end date, and a brief reason.
- For emergencies, notify the appropriate manager or HR as soon as possible and submit the formal request afterward.

5. Approval Workflow

- Employee submits the request.
- The designated HR/manager reviews employee leave requests according to the organization's workflow.
- Requests requiring higher-level approval are forwarded to the appropriate administrator.
- The system records the final status as Pending, Approved, or Rejected.

6. Leave During Notice or Critical Work Periods

Leave during a notice period, critical project period, or other restricted period may require additional approval based on business requirements.

7. Documentation

HR may request supporting documentation where required by company policy or applicable law, particularly for extended or medical leave.

8. Records

Approved and rejected leave requests are retained in the HR system for administrative and reporting purposes.

9. Policy Compliance

Employees are expected to provide accurate information and follow the organization's leave application and notification procedures.
